Author Index—Volume 30 (1999)

(The issue number is given in front of page numbers)

Arantes, R.D., Code orderings for the solution of sparse positive definite linear systems (1) 137–140

Balle, S. and J. Cullum, A parallel algorithm for computing eigenvalues of very large real symmetric matrices on message passing architectures (2–3) 341–365

Benzi, M. and M. Tůma, A comparative study of sparse approximate inverse preconditioners (2–3) 305–340

Best, A., see **Walther, A.** (2–3) 367–377

Brooks, J.P., see **Cisneros, G.** (1) 125–135

Canahualpa, G., see **Claeyssen, J.R.** (1) 65– 78

Carpentier, M.P., see **Lima, P.M.** (1) 93–111

Cisneros, G. and J.P. Brooks, High-performance computing at Silicon Graphics/Cray Research (1) 125–135

Claeyssen, J.R., G. Canahualpa and C. Jung, A direct approach to second-order matrix non-classical vibrating equations (1) 65– 78

Condon, D.J., Corrected finite difference eigenvalues of periodic Sturm–Liouville problems (4) 393–401

Cullum, J., see **Balle, S.** (2–3) 341–365

Datta, B.N., Recent developments on nonmodal and partial modal approaches for control of vibration (1) 41– 52

Datta, B.N., Large-scale matrix computations in control (1) 53– 63

de Souza Cortes, M.B., see **Souza de Cursi, J.E.** (1) 23– 30

de Vilhena, M.T., see **Pazos, R.P.** (1) 79– 92

Frank, J. and C. Vuik, Parallel implementation of a multiblock method with approximate subdomain solution (4) 403–423

Fujino, S., Estimation of conflict-free matrix product preconditioner on vector supercomputers (2–3) 257–266

Gallivan, K.A., see **Meier Yang, U.** (2–3) 155–173

Griewank, A., see **Walther, A.** (2–3) 367–377

Häfner, H., W. Schönauer and R. Weiss, The program package LINSOL: Basic concepts and realization (2–3) 213–224

Huckle, T., Approximate sparsity patterns for the inverse of a matrix and preconditioning (2–3) 291–303

Jung , C., see **Claeyssen, J.R.** (1) 65– 78

Krukier, L.A., Convergence acceleration of triangular iterative methods based on the skew-symmetric part of the matrix (2–3) 281–290

Le Calvez, C. and Y. Saad, Modified Krylov acceleration for parallel environments (2–3) 191–212

Lima, P.M. and M.P. Carpentier, Asymptotic expansions and numerical approximation of nonlinear degenerate boundary-value problems (1) 93–111

Elsevier Science B.V.

Lopes, V.L.R., J.M. Martínez and R. Pérez, On the local convergence of quasi-Newton methods for nonlinear complementarity problems (1) 3–22
